EXPERIENCE

Alten (Consultant at Leonardo)

Mar 2026 - Present | Varese, Italy

- Managed and optimized complex logic architectures within structured enterprise software projects.
- Collaborated daily in multidisciplinary development teams for methodical technical problem-solving and workflow optimization.
- Developed rigorous workflows and logical flow analysis, transferring these skills daily into game systems design and balancing.

Indie Game Devs

Sep 2024 - Present

- Project Shadowseeker (UE5):** Authored the complete bilingual Game Design Document (GDD) and prototyped core gameplay systems using Unreal Blueprints.
- Sandy (Steam):** Managed the Level Design pipeline from paper layout to 3D greybox in Unreal Engine 5, balancing pacing, lighting, and environmental puzzles.
- Le Cronache di Debian (Itch.io):** Solo-developed a classic JRPG, managing combat math, item economy, character progression, and narrative design.

MediaWorld

Oct 2023 - Gen 2025 - Varese, Italy

- Directly managed customer relations, analyzed user needs, and effectively communicated technical specifications of consumer electronics.
- Collaborated in a highly dynamic retail team to achieve established sales performance and customer satisfaction targets.
